

Emily Zhang

Mountain View, CA · (650) 555-0312 · emily.zhang@email.com · linkedin.com/in/emilyzhang

Product Manager with 7+ years driving 0-to-1 products and growth at scale. Technical background (CS degree, former SWE) with expertise in search, recommendations, and ML-powered features. Track record of shipping products used by 100M+ users with measurable business impact.

Experience

Senior Product Manager

Search & Discovery

Spotify

Jan 2021 – Present

Defined and launched personalized search suggestions feature serving 400M+ users, increasing search-to-play conversion by 23% and reducing null result rate by 40%. Designed and analyzed 15+ A/B experiments per quarter, establishing statistical rigor standards (95% CI, minimum detectable effect) adopted across the Discovery org. Partnered with ML engineers to define model architecture for contextual recommendations, incorporating time-of-day, listening history, and social signals into ranking. Led cross-functional team of 12 (4 eng, 2 ML, 3 design, 2 data science, 1 researcher) through discovery, development, and launch of audio-based search. Drove product strategy that contributed to 15% increase in premium conversion from free-tier users through improved content discovery.

Product Manager

Feed Ranking & Relevance

LinkedIn

Mar 2018 – Dec 2020

Owned feed engagement metrics (DAU/MAU, sessions/user, time-spent) for 700M+ member platform, growing daily sessions by 18% YoY. Conducted 40+ user research sessions identifying content quality as top pain point, leading to creator quality scoring system that reduced low-quality content by 35%. Aligned 3 engineering teams (20+ engineers) on unified feed ranking framework, resolving competing priorities through shared OKR structure. Proposed and secured executive buy-in for video-first feed experience, growing video consumption 4x within 8 months of launch.

Associate Product Manager / Software Engineer

Local Search

Yelp

Jun 2015 – Feb 2018

Transitioned from SWE to APM after shipping location-aware notification system that increased app re-engagement by 12%. Defined product requirements for real-time business hours feature, reducing “is this place open?” support tickets by 60%.

Education

MBA – Wharton School, UPenn

2015

B.S. Computer Science – MIT
