SUMMARY

SDET/QA Engineer with 7+ years building test automation frameworks and quality infrastructure for enterprise applications. Designed automation suites achieving 92% code coverage with 15-minute CI feedback loops. Reduced production defect escape rate by 85% while cutting manual testing effort by 70%.

TECHNICAL SKILLS

Automation	Selenium WebDriver, Cypress, Playwright, Appium, RestAssured
Languages	Java, Python, TypeScript, JavaScript
Frameworks	TestNG, JUnit 5, pytest, Robot Framework, Cucumber (BDD)
Performance	JMeter, Gatling, k6, Locust, Artillery
CI/CD	Jenkins, GitHub Actions, GitLab CI, Docker, Kubernetes
API Testing	Postman, REST Assured, GraphQL Testing, Pact
Tools	Allure Reports, TestRail, Jira, Selenium Grid, BrowserStack

EXPERIENCE

- Senior SDET | FinanceHub Platform, Boston May 2021 – Present
- ✓ Architected E2E test framework (Playwright + TypeScript) covering 1,200+ test cases; reduced regression from 5 days to 4 hours
 - ✓ Designed performance testing strategy (Gatling, 50K concurrent users); identified 12 critical bottlenecks pre-launch (est. \$2M saved)
 - ✓ Implemented contract testing (Pact) across 30+ microservices; catching 95% of integration issues at build time
 - ✓ Built test data management platform for 200+ scenarios; reduced env setup from 2 hours to 5 minutes
 - ✓ Integrated quality gates in CI/CD; blocking deploys on coverage drops below 85% or perf regression >10%
- QA Automation Engineer | HealthCare Systems Inc., Cambridge Aug 2019 – Apr 2021
- ✓ Built Selenium Grid running 500+ parallel browser tests (Chrome, Firefox, Safari); execution 6hrs to 45min
 - ✓ Developed API test suite (RestAssured) covering 400+ endpoints at 98% automation rate; 30+ critical defects/sprint
 - ✓ Implemented visual regression testing (Percy); caught 200+ UI inconsistencies across 15 browsers/devices
 - ✓ Created BDD framework (Cucumber) enabling POs to write executable acceptance criteria; +40% requirement clarity
- QA Engineer | RetailTech Corp, Boston Jun 2017 – Jul 2019
- ✓ Automated 300+ manual test cases (Selenium + TestNG); 70% automation coverage, saved 120 hrs/sprint
 - ✓ Conducted load testing (JMeter) identifying memory leaks at 10K concurrent users; prevented Black Friday outage
 - ✓ Established defect triage process reducing avg resolution time from 5 days to 1.5 days

CERTIFICATIONS

ISTQB Advanced Test Automation Engineer | AWS Certified Developer – Associate

EDUCATION

M.S. Software Engineering – Northeastern University, 2017 | B.S. Computer Science – UMass Amherst, 2015
